Apartment
Safe for Your
Family?**

YOU DON'T NEED TO USE TOXIC PESTICIDES TO KEEP OUT INSECTS AND RODENTS

The most effective techniques seal out insects and rodents and eliminate building conditions and household practices that attract these pests. Never use dangerous pesticides that contaminate indoor air and poison people.

For information on Safe Household Pest Management, call Beyond Pesticides, 888-NO-POISON, or visit www.beyondpesticides.org/saferchoice

Studies Show Toxic Household Pesticides:

- increase risks of cancer and asthma.
- affect nervous system and behavior.
- contaminate indoor air, carpets, furniture and surfaces.
- poison pets.
- can be replaced by least-toxic products and practices.

A photograph of a diverse family of four smiling. A man with glasses and a striped shirt is in the center, holding a baby. A woman in a green top is on the right, and a young boy in a blue shirt is on the left. They are outdoors with a blurred background.
